Description:

A very popular shade tree, valued for its delicate, ferny appearance which casts a dappled shade below; foliage emerges a brilliant yellow, fading to light green; broad spreading habit of growth, seedless, very tolerant of adverse growing conditions

Ornamental Attributes:

Sunburst Honeylocust has attractive lime green foliage which emerges gold in spring. The pinnately compound leaves are ornamentally significant and turn an outstanding yellow in the fall. The flowers are not ornamentally significant. The furrowed khaki (brownish-green) bark is not particularly outstanding.

Landscape Attributes:

Sunburst Honeylocust is an open deciduous tree with an upright spreading habit of growth. It lends an extremely fine and delicate texture to the landscape composition which can make it a great accent feature on this basis alone.

This is a relatively low maintenance tree, and is best pruned in late winter once the threat of extreme cold has passed. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. It has no significant negative characteristics.

Sunburst Honeylocust is recommended for the following landscape applications;

- Shade
- Accent

Plant Characteristics:

Sunburst Honeylocust will grow to be about 40 feet tall at maturity, with a spread of 35 feet. It has a high canopy with a typical clearance of 7 feet from the ground, and should not be planted underneath power lines. It grows at a fast rate, and under ideal conditions can be expected to live for 70 years or more.

This tree should only be grown in full sunlight. It is very adaptable to both dry and moist locations, and should do just fine under average home landscape conditions. It is not particular as to soil type or pH, and is able to handle environmental salt. It is highly tolerant of urban pollution and will even thrive in inner city environments.

This is a selection of a native North American species.

This plant is not reliably hardy in our region, and certain restrictions may apply; contact the store for more information.
